Wahl-Eversharp Policy *and* Guarantee

IN presenting to WAHL-EVERSHARP Dealers, our new and most complete number 298 general catalog, we extend to you an invitation to visit in pictures the great WAHL-EVERSHARP plant and view the quality products that you as dealers have played so important a part in making possible.

In return for the faith our dealers have manifested in WAHL-EVERSHARP merchandise over the past decade, we pledge a continuance of those principles of fair dealing that have contributed to the success of WAHL-EVERSHARP Dealers throughout the civilized world. With this pledge we give to you the benefit of The Wahl Company's vast manufacturing facilities, experimental laboratories directed by master craftsmen, where, for years, those developments that have molded the destinies of the industry were originated. It is because of these facilities that we are able to present to you for the first time in the history of writing instrument manufacture, The WAHL-EVERSHARP *Personal-Point Fountain Pen* with the Interchangeable Nib.

Uppermost in our minds is the desire to produce and sell the highest type merchandise possible for human ingenuity and modern machinery to develop and manufacture. Realizing that the dealer must sell our products before they are a success, we have kept in mind only those improvements and changes that mean quicker turnover, least inventory and greater profits for you. The *Personal-Point Pen* further emphasizes this policy.

A word about Guarantee . . . A Guarantee that works no hardship on the dealer and at the same time adds to the convenience of the consumer is in our minds, consistent with twentieth century merchandising methods. The Wahl Company Guarantee is virtually unconditional, yet plainly stated in a way that is sure to be understood by both dealer and consumer.

The Guarantee insures satisfied customers for the dealer made up of a consuming public who have made WAHL-EVERSHARP the standard of comparison for EIGHTEEN years.

The Guarantee

WE, THE WAHL COMPANY, hereby guarantee all Wahl-Eversharp pens and pencils against defects in material and workmanship. If at any time any part of, or material in any pen or pencil, proves defective, send it to our factory, postage prepaid, and enclose ten cents for each item to cover postage and insurance for its return. No charge will be made for repairs due to defects.

The Home of Wahl-Eversharp

Seven acres of floor space devoted to manufacturing Wahl-Eversharp Products

HERE is the first stop on our picture tour of the WAHL-EVERSHARP plant. A complete manufacturing plant—fireproof, of brick, stone and concrete construction—five full floors contain seven acres of floor space. Four floors are given to manufacturing, the fifth houses the executive, sales, product development and general offices.

PACE will permit only a few brief words of explanation as we pass from one department to another—Gold points are alloyed from pure gold, tipped with iridium, ground to jeweler's precision and fitted into pen barrels of every color, style and size required by an exacting public. Permanency must be the keynote of fountain pen value, so Rubber, Gold, Silver and Pyralin are used for beauty, strength and lightness.

In the Pencil Department we see the famous "EVERSHARP" assembled step by step under the watchful eyes of a score of critical inspectors. Because all parts are interchangeable, each one must be perfect. "EVERSHARP," the first mechanical pencil to use thin lead, long ago established a standard of mechanical pencil manufacture.

No pencil would be complete without perfect lead—EVERSHARP Red Top Lead has gained world-wide recognition because of these exacting requirements that make diameter variations less than 1/1000th of an inch.

The wide distribution of EVERSHARP Leads makes the sale of all other mechanical pencils possible and their use in other pencils makes them write better. The three lead diameters now commonly called "Standard" were established by WAHL-EVERSHARP and because they were adopted by all, they soon became "Standard."

First—The .046 lead made a mechanical pencil possible. EVERSHARP originated this size and its practica-

bility is determined by the fact that it is used today in all mechanical pencils.

Second—The .075 lead is commonly called "thick writing lead" and is designed for those who prefer a lead that can be used for checking and manifolding purposes as well as for general writing.

Third —The .120 checking lead has a very definite place in the pencil field. This lead is sometimes known as "Executive" lead, it being especially adapted to checking work and where heavy marking is necessary.

Thus it is that no pencil could be a success were it not for EVERSHARP Red Top leads. They are the standard by which all pencils are sold today.

Last, but by no means least, we come to the Fountain Pen Desk Set Department, where a product of rare beauty and unexcelled utility holds forth. The most remote parts of the earth are searched for materials for desk set bases—Green Onyx from Argentine, Pedrara Onyx from Mexico, and Italy furnishes Portoro (Black and Gold) Marble. In addition to these are Black Carrara Glass, Genuine Bronze and Rare Wood, on which are carved designs created by the masters.

Thus we approach the display rooms in the pages of this catalog, where we get a "close-up" of each item. They must stand on their merits before you, our dealers, to whom our offering is respectfully submitted.

Superior Features of *Personal-Point* Pens

- (1) "Gold Seal"—the mark of a WAHL-EVERSHARP perfect pen with the Interchangeable Nib Unit.
- (2) Soft rubber pad (A) compressed by inner cap walls.
(B) When cap is turned on tightly and firmly, it remains a tight leak-proof fit because the specially ground knife edge shoulder prevents ink or other substances from interfering.
- (3) Sturdy 14K Gold Nib.
- (4) WAHL comb feed controls flow evenly to the last drop.
- (5) Exclusive roller clip holds pen securely in place, yet does not tear or otherwise wear the pocket.
- (6) Cap air vent prevents condensation on pen section and avoids soiling fingers when writing.
- (7) Shapely section most comfortable to finger grip.
- (8) Metal collar for easy placement of section into barrel for "sac" renewals.
- (9) Metal insert strengthens all barrels—lightest weight.
- (10) Unique gold-filled bandings strengthen and beautify pen cap.
- (11) Beautifully shaped and fitted terminal of cap.
- (12) Strong, heaviest wall rubber ink sac. Will not twist.
- (13) 100% efficient filling lever assembly.
- (14) Thumb slot for easy access to lever filler.
- (15) Lever lock holds filling pressure bar in place within barrel. Bar cannot release and fall out of barrel.

SHOWN here are just a few of the exclusive features of the WAHL-EVERSHARP *Personal-Point Fountain Pen*. The Interchangeable nib feature, the result of years of careful study and experimental development, is one of the most important engineering changes made in a fountain pen since the introduction of the self-filler.

All WAHL-EVERSHARP *Pens* shown in this catalog having either No. 4 or No. 6 Gold Seal nibs are fitted with the Interchangeable nib feature and are *Personal-Point Pens*.

The customer selects the holder according to size, style and color. Then he selects the point that fits his personal writing style.

The two are instantly joined by the dealer and the customer goes away happy with his *Personal-Point Pen*.

Superior Features of Wahl-Eversharp Pencils

- (1) Metal insert of cap strengthens cap and assures smooth fit.
- (2) Eraser renewable. Cannot come out in use, but is easily removed for replacement.
- (3) Sturdy eraser shell smooth for cap fit.
- (4) Side opened lead magazine permits lead to tilt out without entirely removing cap piece.
- (5) Metal insert for lightest weight and strongest barrels.
- (6) Spring clip of special design.
- (7) Rolled thread tube for smoothest travel of mechanism.
- (8) Strong and smooth cross head to propel mechanism and lead.
- (9) Housing of device permits "quick release" and withdrawal of the mechanism for reloading when new lead is needed. EVERSHARP is the fastest loading pencil—it requires only a few seconds.
- (10) Perfect alignment of lead in feed tube extending to hardened steel rifled tip.
- (11) WAHL-EVERSHARP patented rifled-tip holds lead firmly, protects from breaking and prevents lead turning.

EVERSHARP is the best known pencil today because it was EVERSHARP that made the mechanical pencil possible through its adoption of certain standard diameters for the leads used in those pencils. EVERSHARP was the first mechanical pencil to use thin lead, which is now standard in all pencils.

EVERSHARP—the mechanical features of which are shown on this page—has certain fundamental advantages for the user that are not found in other pencils. The rifled tip (patented) affords tiny relief space between the lead-gripping teeth, to prevent clogging or jamming. Still the lead is held firmly at the point—no slipping—no wobbling. The genuine EVERSHARP can be identified by the grooves cut in the lead as it passes through the tip.

EVERSHARP loads in an instant. The automatic trigger release makes this possible. One pull—insert lead. One push—a turn—that's all. Extra leads are accessible immediately through the side opening in the lead magazine. The exact amount of lead in the pencil can be determined by simply pulling the cap out.

WAHL-EVERSHARP *Personal-Point* FOUNTAIN PENS

The Gold Seal Line

IT IS a source of pleasure and gratification for us to offer our dealers, in this catalog, the WAHL-EVERSHARP line of *Personal-Point Fountain Pens*, identified by the Gold Seal of quality and incorporating what is undoubtedly the greatest improvement ever made in a fountain pen—the Interchangeable Nib.

Never before has it been possible for all dealers to carry sufficient stock to offer their customers exactly the points they desire, in the great variety of styles, colors, and sizes of holders.

The introduction of the Interchangeable Nib does not affect any sale that can be made without it. The advantages are paramount when the customer is pleased with the size, style and color of one pen, but prefers the point in some other. In cases like this, the sale would be lost were it not possible for the sales person to make the change. Only one minute is required to make a custom-built pen for the customer.

The Gold Seal line is complete in every detail, yet it is possible for the dealer to carry only one-fourteenth as much stock to make an equal number of sales as he could with any other line.

All No. 4 and No. 6 WAHL-EVERSHARP *Pens* priced at \$5.00 and up are fitted with the Interchangeable Nib Unit, identified by the Gold Seal of quality. All No. 4 and No. 6 Desk Pens have the Interchangeable Nib feature and *points in desk pens are interchangeable with those in pocket pens* as well.

The *Personal-Point Pen* offers a number of exclusive advantages:

1. Greater Consumer Appeal—"A Personally Selected Point."
2. Exclusive Sales Feature.
3. Smaller Investment.
4. Faster Turnover.
5. More Variety—It tempts more buyers.
6. Highest Profit Per Square Foot of Counter Space.
7. Assured Profit—No "dead" stock.
8. Complete stock in smallest space.
9. Easier Sales.
10. Highest average unit price.
11. Only WAHL-EVERSHARP Dealers "get it."

"A Mile Wide and A Foot Deep" characterizes your stock of WAHL-EVERSHARP *Personal-Point Pens*. "A mile wide" because of the great variety offered by four styles, six colors and fourteen points—each instantly interchangeable. Such a variety tempts more customers—thus giving them the urge to buy.

"A foot deep" because with a limited stock of *Personal-Point Pens*, you can make every sale. The inventory value of your stock is at a minimum.

WAHL-EVERSHARP
Personal-Point
FOUNTAIN PENS

WAHL-EVERSHARP *Personal-Point Pens*, identified by the Gold Seal of quality, are the standards of comparison. The roller clip is an exclusive feature—all mountings are gold-filled. The distinctive engraved banding design is a product of master designers. Pens are fitted with Gold Seal No. 6 Interchangeable nibs in a choice of fourteen points. The Interchangeable nib feature makes it possible for the customer to select from fourteen nibs and six different colors.

WAHL - EVERSHARP

IN the WAHL-EVERSHARP line there is a pencil to match every pen. The roller clip, rifled tip, automatic lead index, instant loading, concealed eraser, extra leads in lead magazine, and automatic release are all exclusive features. All mountings are gold-filled. The banding designs are Grecian in effect, to match pens, with single gold bands on end of cap and barrel. All of these are superior features of EVERSHARP Pencils.

WAHL - EVERSHARP

For Milady's purse, these EVERSHARP Pencils in colors to match the pens on the opposite page are the last word in attractiveness. Fitted with ring caps and gold-filled bands. The concealed eraser and extra supply of leads in the lead magazine add to the utility of these pencils for the business or professional woman. EVERSHARP was the first mechanical pencil to use thin lead and today EVERSHARP means mechanical pencil perfection. These models in attractive colors and natty gold trimmings are fitting companions for the pens shown opposite.

Wahl-Eversharp

EQUI-POISED *Pens and Pencils* characterize the "ultra-modern" in writing instrument design. These *Personal-Point Pens* with the Interchangeable Nib feature are the *last word in style*; designed to fill a twentieth century public demand. The *Equi-Poised* pen is the only pen of this style that can be selected for color and at the same time be fitted with the EVERSARP Interchangeable Nib. A point for any hand—fitted instantly to any holder.

Added to the distinct style of the *Equi-Poised Personal-Point Pen*, is the unusual choice of colors. Bronze-Green (a WAHL-EVERSHARP creation) has already won the stamp of public approval. In addition, these popular numbers can be had in Black and Pearl, Jade Green, and Jet Black. All of these materials are *Pyralin*—practically indestructible.

The EVERSARPS to match these pens need no introduction. Years of successful performance for the writing world has made it possible for us to offer this unusual line of pencils as companions for the pens justly called "*Equi-Poised*" (equally balanced).

WAHL-EVERSHARP
Personal-Point
FOUNTAIN PENS

WAHL-EVERSHARP *Equi-Poised Personal-Point Fountain Pens* are supplied in four popular colors—Black and Pearl, Bronze-Green, Jet Black, and Jade Green. Shown on this page are those numbers having greatest feminine appeal. Cap ring, bands, and filling lever are gold-filled. Pens are fitted with No. 4 Gold Seal nibs. These *Equi-Poised, Personal-Point Pens* are indeed Personal writing tools because in addition to their unusual beauty the Interchangeable nib is an added feature. Point and holder can be selected separately.

WAHL-EVERSHARP
Personal-Point
FOUNTAIN PENS

WHAT man would not be proud to have one of these *Equi-Poised Personal-Point Pens* nestling in his vest pocket? A color personally chosen—a point selected to fit his individual hand is permanently jointed for him at your own pen counter. Men who demand “writing ease” will select the *Equi-Poised Pen*, not merely because of the equal balance for writing, but because they can choose the particular point best suited to the hand.

All mountings are gold-filled, with the exclusive roller clip and fitted with No. 4 Gold Seal Interchangeable nibs. They may be carried in the coat or vest pocket, or used as a desk pen in the regular WAHL-EVERSHARP Humidor.

Wahl-Eversharp Fountain Pen Desk Sets

MODERN business as well as modern homes demand the best in desk writing equipment. WAHL-EVERSHARP *Fountain Pen Desk Sets* are designed to meet every desk need. Beauty and utility have been combined to make these sets the leaders in the field.

To meet the demands of today, writing equipment for the desk must embody certain mechanical features necessary for complete efficiency. WAHL-EVERSHARP *Desk Sets* meet every requirement.

Foremost among these, is the ball and socket joint, permitting the desk pen to stand in any position desired by the user. If desired, the pens may be placed at an angle of 10 degrees—low enough for the set to be placed in a desk drawer.

The desk set supplies a long felt want in both office and home. Its true worth is determined by the Humidor receptacle in which the desk pen rests. It must be so constructed that a circulation of air at the right point prevents accumulation of moisture on the pen section. This feature assures the user a moist nib at all times, with no ink on the fingers when writing. The Humidor of the WAHL-EVERSHARP *Desk Set* holds the pen in a practically air-tight space, thus preventing any vacuum formation. This feature accounts for the constant satisfaction assured the user of a WAHL-EVERSHARP *Fountain Pen Desk Set*.

The pens, too, must be properly balanced to prevent fatigue during long hours of writing. WAHL-EVERSHARP *Desk Pens* are built for exclusive desk use. The entire quill is tapered for the perfect balance that is not found when regular pocket pens are used for desk pens. The better sets in the WAHL-EVERSHARP

line are fitted with *Personal-Point Pens*, with the Interchangeable Nib feature. This assures the user the same personally selected point that is possible with a WAHL-EVERSHARP pocket pen.

At least a part of the world-wide popularity of WAHL-EVERSHARP *Fountain Pen Desk Sets* can be attributed to the very unusual materials used in making the bases. No expense is spared in bringing the choicest Onyx and Marble from the most remote corners of the Universe.

Onyx is perhaps one of the oldest of stones, its origin having been traced back to King Solomon's temple. Only a few Onyx quarries are known to the world—less than six producing in merchantable sizes and quantities. The largest and best known of these quarries is in lower California, about three hundred miles south of San Diego and fifty-five miles inland. This desolate stretch of desert, a spot almost forgotten by man, is thus producing one of the most beautiful and valuable of commercial stones.

To insure perfect bases for WAHL-EVERSHARP *Desk Sets*, our selections are made from blocks from three to six feet thick, twenty-four to forty-two inches wide, and ten to twelve feet long. This careful selection eliminates the "quarry run" and insures our getting only the very best stone for all our bases. It has been learned from eminent authorities that in the color formation of Pedrara Onyx, next in importance to lime is iron. This mineral in different states of combination, together with manganese (a brittle metal similar to iron, having a grayish white color tinged with red) cause the color variation. The beautiful banding or waving lines is a peculiar feature of this material.

Wahl-Eversharp Fountain Pen Desk Sets—*Continued*

The coloring in Pedrara Onyx, from which WAHL-EVERSHARP bases are made, ranges from virgin white, through the most exquisite tints of green, rose, yellow, brown and some blue—appearing in delicate veins or broad bands, or in cloudlike masses of rich color. It is this infinite variety of wonderful and beautiful marks and tints that lend to our Pedrara Onyx bases their chief charm and place them in a class by themselves as a decorative stone.

Italian Portoro Marble, commonly called "Black and Gold," comes to us from Italy. Throughout Europe there are a number of quarries producing Black and Gold marble, but we insist that ours comes from those quarries where is produced a marble that has been selected by our European representatives as being best suited to our use. To insure only perfect stone, each block is carefully inspected before shipping to this country, where it is reinspected before being cut or polished. Without

this careful inspection we could not offer our dealers the very best grade of Black and Gold Marble obtainable.

Argentine Onyx is produced and brought to us from the only known quarry located in the Republic of Argentina in South America. In composition this Onyx is very similar to Pedrara Onyx—the chief difference being its color, which is almost entirely green, with occasional streaks of subdued red or brown. Only this imported Onyx contains these beautiful colors, in addition to being of perfect composition. Our foreign representatives have selected this stone for its beauty and quality, that we might have the benefit of the years of experience of European and Latin American fabricators.

The Black Carrara Glass used in the manufacture of our desk set bases is produced in our own country by the largest plate glass manufacturers. Imported glass will not respond to the various polishing operations necessary to produce our high quality bases.

EXECUTIVE Fountain Pen Desk Set with beautiful lamp attachment. This set will add beauty and dignity to the executive's desk. The bronze shade may be adjusted to throw light well over the desk. Base of Pedrara Onyx with two pencil grooves and fancy beveled edge. Size approximately 8" x 13". Wherever a touch of beauty is desired in the modern executive office, this set will add that touch and at the same time supply a daily need.

A PARTICULAR set for "Particular People," designed for either office or home use. This set is especially adapted to the home desk because the oval Pedrara Onyx base measures only about 4" x 7" and can be used where space is limited. Mounted with one No. 7413DP Coral *Personal-Point Desk Pen*, fitted with No. 4 Gold Seal Interchangeable nib. Whenever necessary the points in *Personal-Point Pocket Pens* may be interchanged with those in *Personal-Point Desk Pens*. This added convenience will promote the sale of higher priced desk sets because the customer can always be supplied with a point that exactly suits his individual style.

AND now we pass from the Desk Set Department where these writing instruments of beauty and utility start their journey to all parts of the civilized world. WAHL-EVERSHARP Fountain Pen Desk Sets supply the writing need for every kind of desk work. The

Personal-Point Desk Pen with the Interchangeable nib makes personal nib selection possible. No longer is it necessary for the executive, clerk, or home desk to worry along with the old-fashioned dip pen and messy ink well. The wide selection of sets shown in this catalog will answer every customer's need.

WAHL-EVERSHARP

THESE WAHL-EVERSHARP *Desk Pencils* have been styled after the famous perfectly balanced WAHL-EVERSHARP *Desk Fountain Pens*. With practically every desk set, there is use for one of these desk pencils made in six popular colors that may be used with a wide variety of bases and desk pens. These EVERSHARPS have the same perfect mechanism found in all EVERSHARP *Pocket Pencils*—the first mechanical pencil to use thin lead.

WAHL-EVERSHARP

MACHINE ENGRAVED NAMES—Either individual names or firm names and addresses can be engraved on desk set bases in plain block type, letters filled in with a contrasting color enamel.

FACSIMILE SIGNATURE REPRODUCTIONS—An exact reproduction of any personal signature, filled in contrasting color on Marble or Onyx bases only.

ETCHED OXIDIZED OR COLOR PLATES—Reproduction of trade-marks in outline or in colors—plates of bronze or brass. Samples of standard sized plates on request.

GOLD FILLED PLATES OR WASHERS—Plates of a size to conform to size of base, suitable for hand engraving personal names or presentation messages. Washers with $\frac{3}{8}$ " rim to place under pen swivel for engraving.

GOLD STAMPING ON LEATHER BASES—Single names in plain block type, a different name on each base. Standard imprints in plain block type—the same imprint on all bases.

Personalizing Wahl-Eversharp Fountain Pen Desk Sets

WAHL-EVERSHARP *Fountain Pen Desk Sets* stand supreme as personal and business gifts. Our skilled engravers have perfected numerous designs for enhancing the gift value of the Desk Set.

On this page we are listing a few of the many ways in which we can actually personalize the Desk Set and make it the gift of gifts!

Every set in our extensive line can be engraved or fitted with beautiful and dignified name plates. Christmas, birthday, wedding and anniversary gifts will be prized and valued beyond expectation if they are WAHL-

EVERSHARP *Desk Sets* tastefully engraved with the recipient's name.

Many business houses that are averse to presenting the usual advertising calendars, memo pads, etc., will welcome the opportunity to purchase desk sets imprinted with their trade-mark or business name. This is an advertising gift that will be appreciated and one that will continually act as a reminder of the donor.

Lack of space makes it impossible to outline every way in which the desk sets can be engraved. We shall be happy to furnish additional information upon request.

WAHL - EVERSHARP

Precious Metal Pens and Pencils

FOREMOST among the finer writing instruments in the WAHL-EVERSHARP line is a complete selection of precious metal pens and pencils, both yellow and green gold, as well as Sterling. Each of these items is built to jeweler's precision because we feel the retail dealer today has a right to expect the manufacturer whose products he handles to keep those products abreast of the times, in keeping with the demands of his customers.

WAHL-EVERSHARP gave to the fountain pen and pencil industry the first precious metal writing instruments built on a practical basis, a merchandisable writing tool because it filled a long felt consumer desire.

Even today there are those who prefer to carry a pen and pencil of precious metal, and because our dealers are looked upon to supply this highest type merchandise, we have shown a complete line in this catalog.

Certain practical advantages are found in these WAHL-EVERSHARP precious metal pens and pencils. Because of the mechanical construction,

although much smaller in size, the metal pen has an ink capacity equal or greater than any of the so-called "Jumbo" or "Oversize" composition pens sold over the counter. Among the superior features are the rolled metal threads, compact filling device, silver lined cap, exclusive EVERSHARP clip, and most important, the beautiful jewelry designs created by our own artists.

The EVERSHARPS to match these various pens in several different metals each contain the famous perfect EVERSHARP mechanism. Perhaps because EVERSHARP was the first mechanical pencil to use thin lead, accounts for its unrivaled popularity throughout the civilized world. Like all EVERSHARPS, these pencils contain everything a fine pencil should have—the patented rifle tip that made a mechanical pencil possible (it insures a tight lead), instant loading, extra lead magazine, exclusive pocket clip, and the great advantage of having all parts interchangeable.

On the pages that follow are colorful reproductions of these precious metal pens and pencils in a variety of styles, sizes and metals.

WAHL - EVERSHARP

WHEN a really worth-while and practical gift is wanted, these Green or Yellow 14K Solid Gold WAHL-EVERSHARP Pens with the pencils, shown opposite, will bring joy and satisfaction to the recipient. A logical selection for those desiring something better.

The Wahl Well

The New and Improved Way to Fill Fountain Pens

THE WAHL Well is the first satisfactory device ever offered for filling modern fountain pens without soiling the hands. It is the result of many months of work to develop a convenient fountain-pen filling device which would be easy to operate, preserve the quality of the ink, avoid sedimentation and evaporation, withdraw all the ink without tipping, and prevent pen point from coming in contact with the hard glass surface. It entirely eliminates the messiness which has always accompanied the filling of a fountain pen.

The WAHL Well holds six ounces of the best quality permanent Royal Blue fountain pen ink that it is possible to manufacture. It is simple to operate, and makes the filling of pens easier and more pleasant. The pen barrel is not immersed in the ink. Filling a pen from the old ink bottle was invariably a messy operation, and no one ever had a rag handy to dry the pen and fingers after performing the task.

One will find real satisfaction in filling a pen the WAHL Well way.

Advantages

1. Keeps pen and fingers clean—the ink is drawn up into the inside of the pen—no ink is deposited on outside of barrel. The simplicity and ease in operating the WAHL Well to fill fountain pens this clean, neat way quickly wins the prospect to this new method and device.

2. Protects pen point—prevents point of pen touching hard glass bottom of bottle. This is a boon to the fountain pen and the satisfactory service required of it in use. Frequently the pen point is bent or forced out of proper position by stubbing it on the glass bottom in filling in the ordinary open-mouth ink bottle. This cannot occur in the WAHL Well.
3. Prevents waste—all ink can be withdrawn without tipping bottle. The patented stopper, with the rubber tube reaching down to the very bottom of the well, forms a hermetic seal, so that even though the cap is left off the bottle, the ink will not spill when the bottle is tipped over.
4. Keeps ink clean and in good condition—stopper prevents dust and dirt getting into ink. No matter how long the bottle is in the desk, due to the patented stopper, the ink is always clean. Evaporation cannot take place in the WAHL Well and there is never any thick or dirty ink to fill up and clog the feed channels of your pen. With no thick and gummy ink to choke your pen, it is necessary to wash the pen with water much less frequently—and good, clean ink insures greater length of life for the rubber ink sac of your pen.

Every person who has a desk set or an ordinary fountain pen should have a WAHL Well in his desk drawer, as it is the easiest and most convenient way to fill a fountain pen. Experience has shown that once a person has used the WAHL Well and become accustomed to its many conveniences, he will never go back to the ordinary ink bottle.

This unusual and attractively shaped bottle is further identified by a red cap.

No.	LIST PRICE	TEL. WORD	
NK1	\$0.50 Each \$6.00 Dozen	SKINP	1 WAHL Well containing 6 oz. Blue-black Ink
NK2	\$0.50 Each \$6.00 Dozen	TRORB	1 WAHL Well containing 6 oz. Royal Blue Ink

Minimum order is One Dozen Bottles.

Each bottle is packed in a neat blue cardboard box with a red top. Twelve WAHL Wells are packed in a case.

How the WAHL WELL Operates

With filling lever open, push the pen down into the rubber stopper snugly until the lower part of the barrel makes an air-tight fit, as demonstrated in illustration.

When the filling lever is released, the suction of the ink sac immediately draws the ink up through the rubber tube that extends to the lowest part of the bottle into the reservoir into which the pen point has been placed, and the ink is sucked on up into the barrel of the pen. After holding the pen in the stopper for ten seconds to allow it to draw a full charge of ink, it is removed and is ready to write instantly. There is no ink on the lower barrel section which must be wiped off, as it has not been in the ink.

Eversharp Utility Unit

THE EVERSHARP UTILITY UNIT is an attractive package originated and designed to provide a greater number of people with EVERSHARP pencils for use in offices, schools and homes. The Unit is made up of—

- 1 special enameled EVERSHARP, value.....\$1.50
- 6 tubes Red Top EVERSHARP Lead (18 sticks in tube: total, 108 sticks), value..... .90
- 6 EVERSHARP Erasers, value..... .10
- 1 Instruction sheet.....

Total value.....\$1.50
List price for complete unit.....\$1.00

The list price of \$1.00 for this package gives an unusual purchase, as the six tubes of Red Top Lead and six erasers alone are worth the price of the Unit, making the genuine 50c EVERSHARP included free.

This self-contained unit is enclosed in the neat and inviting package illustrated above in actual size. Just large enough to hold the pencil, leads and erasers. A permanent, strong box, which can be used to store the extra leads and erasers as long as they last.

This offer of free EVERSHARP pencils has a fine appeal to every office—large and small. Many offices are now furnishing refill leads to their employees. Here is a fine way to secure the pencil as well and do away with the annoyance and high cost of wooden pencils.

Most suitable is this Utility Unit for the student. It is a perfect piece of equipment for his requirements. Every student, whether in grade school, high school or college, can easily pay for a Utility Unit out of the savings in

wooden pencils in a very short time. With one of these Units he will have a genuine EVERSHARP, with years of service ahead of it, plus a year's supply of refill leads.

You can buy Red Top Leads in the Utility Unit in any one of the seven standard degrees of hardness. Only one grade of lead is packed in each individual unit, but cartons of a dozen units may be assorted if you prefer. (B or HB is the usual choice for general work, and HB will be shipped on orders not clearly specifying grade.) The EVERSHARPS are also provided with clip or without clip, as preferred.

Each Unit is packed in individual box—12 boxes to counter display carton. List Price \$12.00 per dozen units. Minimum order, 12 boxes. (Assorted grades if desired.)

Red Top Eversharp Thin Leads

RED TOP EVERSHARP LEADS are made of the finest grades of domestic and imported graphites, clays and waxes. They are made in our own complete plant—strong, smooth-writing and uniform year after year both as to grade and color.

The diameter of Red Top EVERSHARP Leads is accurately maintained to fit the patented rifled tips of EVERSHARP pencils. For perfect writing satisfaction, only EVERSHARP Leads should be used.

Made in the following grades and colors (standard EVERSHARP thin diameter):

BLACK—(Seven Grades)
 2B—Extra Soft B—Soft HB—Medium Soft F—Firm
 H—Medium Hard 2H—Hard 4H—Very Hard

COLORS—(Medium Grade Only)
 Red Blue Green Yellow Purple Copying (Indelible)

EVERSHARP leads are packed in Red Top containers as follows:

18 sticks of black lead, any grade, in metal tube.

12 sticks of colored lead in metal tube of same color.

List Price: 15 cents per tube. Minimum order, 12 tubes of one grade or color.

144 sticks of lead of one grade or color in sliding cardboard box, for office use (illustrated at left).

List Price: Black Lead, 75c per box. Red, Blue, Green, Yellow and Purple Copying (Indelible), \$1.50 per box. Minimum order—one box.

Eversharp Erasers

Every EVERSHARP eraser can be easily replaced, when worn out, with a new one. They are made of firm, smooth, red rubber and have excellent erasing qualities. Above are shown the four sizes and styles of EVERSHARP erasers, and a brief explanation to indicate with which EVERSHARP pencils they are used. When ordering extra erasers, be sure to specify the styles wanted.

REG—Mounted eraser for use with all regular diameter precious-metal, rubber-barrel EVERSHARPS, enameled-barrel pencils with a double magazine and the new Oversize models with straight caps.

BM—Mounted eraser for use with bakelite-barrel EVERSHARPS having the eraser shell open at both ends. Also used with the enameled-barrel pencils.

SJ—Short, mounted Jumbo eraser for use with \$3.00 and \$3.50 Oversize EVERSHARPS having a metal cap to conceal eraser.

LJ—Long, mounted Jumbo eraser for use with \$0.60 and \$1.00 Oversize EVERSHARPS.

Red Top Eversharp Thick Writing Leads

NEW departure in lead making is marked by the addition of these medium-thick writing leads for use in EVERSHPAR pencils. They are made especially for those who like to write with a heavy line, and who prefer a lead that can be used for checking and manifold-ing, as well as for continuous writing purposes. They are .075 of an inch in diameter, as compared with the .046 of an inch in diameter of the standard thin leads.

Only the finest materials are used in the manufacture of these leads. They are carefully calibrated to a constant diameter, and are of the same high quality in strength, smoothness and uniformity of grade and color as the regular line of thin diameter EVERSHPAR leads.

BLACK
(Graphite)
Medium
Soft

COLORS
(Medium Grade Only)
Red Green
Blue Yellow
Purple Copying (Indelible)

Packed eight sticks of one grade or color in Red Top metal tube. For easy identification, tubes correspond in color with the leads.

List Price: 15 cents per tube. Minimum order - twelve tubes of one grade or color, packed in carton.

Eversharp Checking Leads

EVERSHARP *Checking Leads* are made for use in the EVERSHPAR Checking and "Executive" pencils. These leads are .120 of an inch in diameter, and are especially adapted to heavy checking work, or marking rough surfaces. EVERSHPAR *Checking Leads* are furnished in two grades: No. 1 (medium soft), and No. 2 (extra soft). The No. 2 grade writes well on glass, china, and other smooth surfaces. Both grades are made in the following colors:

Red
Blue
Black
Green
Yellow

Purple Copying (Indelible) *Checking Leads*, which write black and copy purple, can be furnished in the No. 1 grade (medium soft) only.

EVERSHARP *Checking Leads* are packed six of one grade or color in cardboard box, as shown above.

One box of checking leads included free with each Checking or "Executive" pencil. Black checking leads are always furnished unless otherwise ordered.

List Price: 15 cents. Minimum order - 6 boxes of assorted grades and colors.

Eversharp Lead Counter Display Assortment

INCREASED sales of EVERSARP Leads follow wherever they are displayed in these handsome counter display stands. The stands are a constant reminder to your customers, and serve as an invitation to them to reload their EVERSARPS. Every store can profit by the use of one or more of these busy silent salesmen placed in prominent locations.

EVERSARP Lead counter display stands are very substantially built, beautifully colored, and will remain attractive for years. They can be refilled easily when the assortment of leads needs replenishing. Lead tubes are projected for removal by patented trigger release.

These lead stands are made in two sizes, and are furnished only with standard assortments of EVERSARP Leads as listed on this page.

No. 12 Lead Stand Assortment

Here is a practical assortment for the dealer who wishes a small stand with a complete assortment of Red Top Leads. This stand has the same trigger release as the one shown above and requires only half the space on the counter. Assortment contains:

24 tubes HB, 12 tubes each 2B, B, F and H, 6 tubes each Red, Blue and Indelible .046 diameter; 3 tubes each Soft Black and Medium Black, 2 tubes each Red, Blue and Indelible .075 diameter; 3 Boxes each Regular, BM, LJ and SJ Erasers.

List Price \$16.50

No. 12 Lead Stand shown at left furnished free with each assortment.

Red Top Eversharp Lead Assortment No. 100

Large size assortment. Contents: 12 tubes each, grades 2B, B, HB, F, H, 2H, 4H, Red, Blue, Green, Yellow and Purple .046 diameter Lead; and 9 tubes each, grades Black Soft, Black Medium, Red, Blue, Green, Yellow and Purple .075 diameter Lead. Also 4 boxes each Regular, LJ, BM, and SJ Erasers.

Display Stand shown above furnished FREE with this assortment. List Price: \$32.65.

Wahl-Eversharp Gold Seal Nibs

WAHL-EVERSHARP No. 2 nibs are ideal for those who prefer a small pen and they are particularly well adapted to the feminine hand. These nibs are made with the same care and precision as all WAHL-EVERSHARP nibs and the very generous application of iridium on the point makes these nibs second to none for durability and service. These flexible nibs are slightly longer than other nibs,

they yield slightly under the slightest pressure and shade easily when desired. Flexible nibs are excellent for general use and for those who prefer a cushion effect for shading the letters. The fine, medium and broad models give the user a choice as to width of tip and consequent thickness of lines. The No. 0 nib is made with medium tip only.

Above we have illustrated the fourteen *Gold Seal* nibs, No. 4 size. The style and writing qualities of these nibs are identical with the No. 6 nibs shown below—the only difference being in the size. All WAHL-EVERSHARP nibs are stamped from 14K gold and ground by expert nib grinders. These skilled craftsmen, under the direction of critical inspectors, produce in THE WAHL COMPANY plant, the entire nib. No part of the manufacture is left to outsiders or those not thoroughly familiar with general writing habits. Manifold nibs are very stiff. Considerable pressure can be applied to them without affecting

the line in writing. The Signature (semi-flexible) nib is a WAHL-EVERSHARP creation. Signature nibs respond slightly to pressure and are ideal for all general purposes. Flexible nibs are excellent for shading or for those who apply practically no pressure to the paper. Among the WAHL-EVERSHARP *Gold Seal* nibs is one to exactly fit the hand of each individual. Retail salespeople should study the customer's hand when showing a pen and thus select almost instantly the proper point for that particular individual.

WAHL-EVERSHARP *Gold Seal* nibs are made in two sizes, No. 4 and No. 6. The No. 6 nibs shown above are furnished in three degrees of flexibility—Manifold, Signature and Flexible. Each of these three is furnished in a complete range of fineness from a very fine to the broad stub. The above illustration shows a choice of fourteen popular nibs from which can be selected a point for any style of writing. These nibs are stamped "WAHL-EVERSHARP Gold Seal" which is the identifying mark of a perfect nib. Manifold nibs are very stiff. Consid-

erable pressure can be applied to them without affecting the line in writing. The Signature (semi-flexible) nib is a WAHL-EVERSHARP creation. Signature nibs respond slightly to pressure and are ideal for all general purposes. Flexible nibs are excellent for shading or for those who apply practically no pressure to the paper. Each nib is made from pure gold alloyed to 14K and tipped with the highest grade osmiridium—the hardest known metal, to insure long and satisfactory service.

Eversharp Enameled Emblem Caps

The emblems shown above are beautifully enameled in full colors on the top of EVERSHPAR pencil caps.

Orders for silver-plated, sterling silver, and gold-filled EVERSHPARs bearing caps with the emblem of any of the following organizations can be furnished from stock:

Blue Lodge	K. of C.	Elk	Rotary
Shrine	M. W. A.	Kiwanis	

Complete information regarding special emblem caps for other organizations, schools, or with trade-marks, furnished upon request.

Styles of Hand Engraving

Any of the above styles, with the exception of No. 63, can be engraved on all WAHL-EVERSHARP Pens and Pencils. Style No. 63 can be engraved only on pencils and pens with plain barrels. Single initials and condensed monogram styles can be engraved on the tops of pen and pencil caps.
